

SaaS-Sarcasm as a Service

By Shivam Sharma

PROBLEM STATEMENT

In today's fast-paced digital world, witty comebacks are a necessity—whether in arguments, debates, or casual banter. However, not everyone is naturally gifted with quick, sharp, and savage responses. People often struggle to think of the perfect retort in the heat of the moment, leading to missed opportunities for epic comebacks

SOLUTION!!

Tired of weak comebacks? Need to shut someone down instantly? Welcome to SaaS – Sarcasm as a Service, your AI-powered weapon of razor-sharp wit! Whether it's a snarky clapback or a devastatingly savage retort, our AI delivers next-level sarcasm on demand. No filter, no mercy—just pure, unadulterated comebacks to leave your friends (or enemies) speechless.

No more regretting what you should have said—our AI ensures you always have the last word, delivered with peak sarcasm and precision.

FEATURES

AI powered sharp comebacks so that you never miss a great opportunity

Multi Level comeback ranging from low, mid and high

Need replies in Hind/Hinglish? You got that too.

SERVICES USED

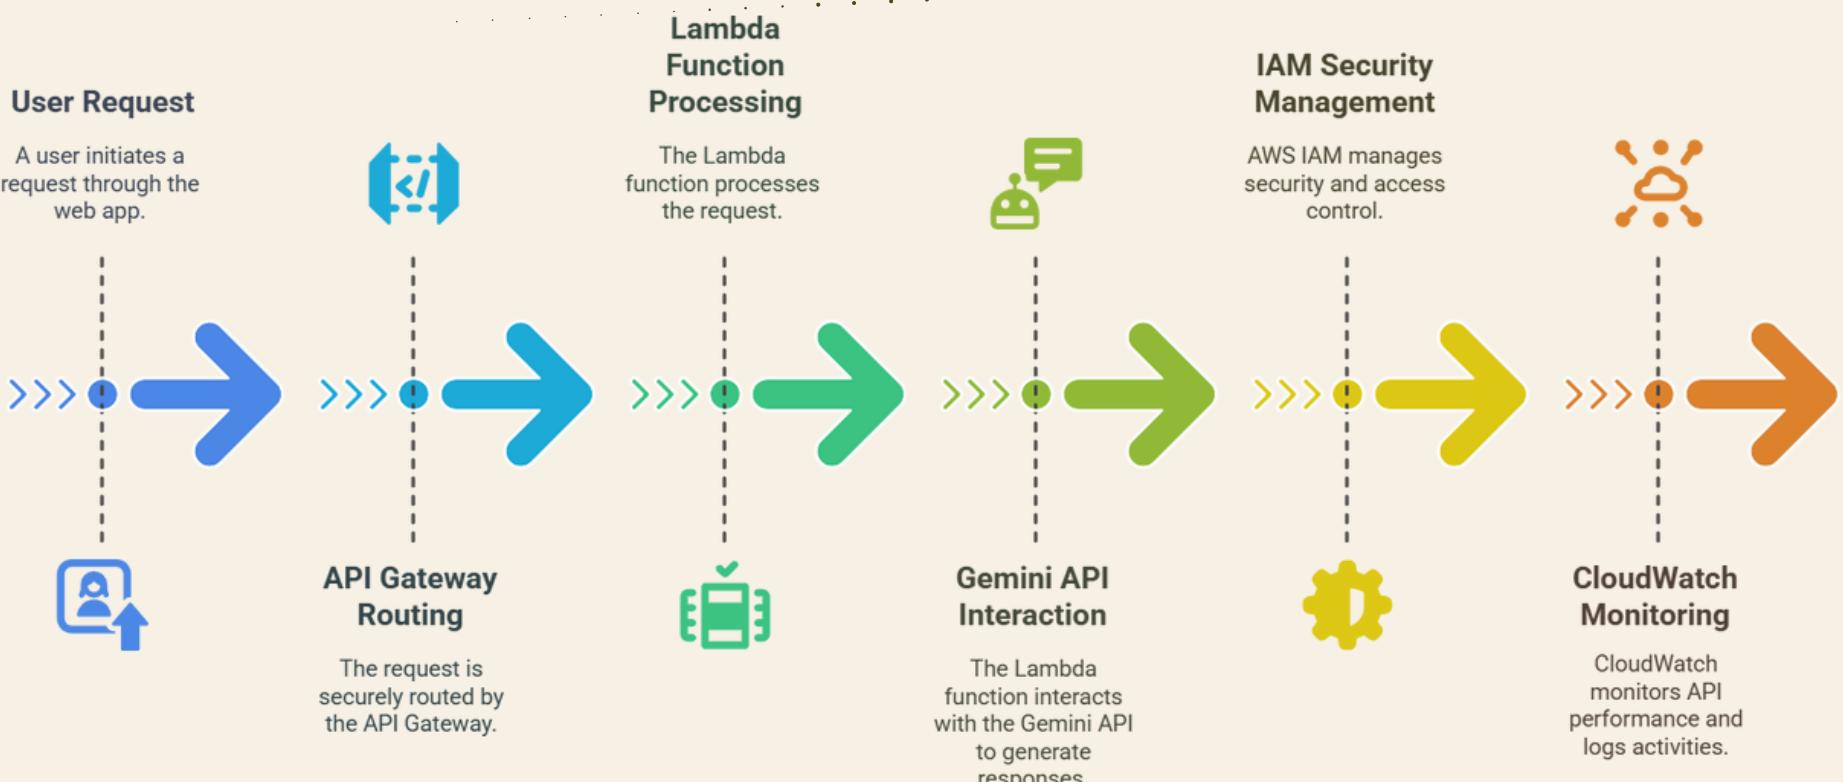

- **AWS Lambda** – Runs the serverless backend for processing comeback requests.
- **Amazon API Gateway** – Exposes the Lambda function as an HTTP endpoint.
- **AWS Amplify** – Simplifies frontend hosting and deployment.
- **Amazon CloudWatch** – Monitors logs and performance of Lambda functions.
- **AWS IAM** (Identity and Access Management) – Manages permissions and security roles for Lambda and other services.
- **Gemini API Key** - For AI Powered Comeback.

COMING UP

- **Login Page** – Secure authentication to personalize your experience.
- **History Section** – View and revisit your past savage comebacks.
- **Leaderboard** – Compete with friends and track who has the wittiest comebacks! 🔥
